🧠 SKILLS

Python

Professional Python developer with strong skills in object-oriented programming and working with files. Currently building a project and always learning new things.

HTML

Highly proficient in HTML, with a strong understanding of semantic markup and web structure. Experienced in creating well-organized and accessible content for diverse websites. know bootstrap framework.

MySQL

Experienced with MySQL databases: creating schemas, querying data, and managing information for various applications using SQL.

JavaScript

Highly skilled in JavaScript with a deep understanding of core concepts and extensive DOM manipulation experience. Proficient in building dynamic and interactive web experiences, including game development using DOM and jQuery.

CSS

Extensive CSS experience for engaging, responsive website styling using modern techniques to create appealing UIs.

React

Actively learning React: proficient in JSX, ES6+, props. Eager to build dynamic UIs.

📁 PROJECTS

Air Draw

Python application for air gesture drawing via webcam, converting movements to sketches. Integrated web search finds images based on these real-time drawings.

Dice Challenge game

Developed a simple two-player dice game website using HTML, CSS, and JavaScript, where refreshing the page simulates dice rolls to determine the winner.

Drumkit

Interactive JavaScript web drumkit using DOM manipulation. Keyboard/mouse events trigger sounds, showcasing event handling and dynamic updates.

Hangman

Python Hangman game with user-friendly feedback, implementing core game mechanics like word selection and win/loss.

Foodie

Engaging platform promoting healthy food benefits over junk food to inform users and encourage better eating.

Simon Game

Memory game built with HTML, CSS, and jQuery where players repeat increasingly complex light and sound sequences. Demonstrates event handling, animations, and game logic in web development.
